- ✓ EPDM rubber is also available in black.
- ✓ TÜV certified.

FIFTY+ ARM ROTATION FIT4LIFE

Article: 1388

The Fifty+ Arm rotation consists of a frame with two discs to which handles are attached. This allows the disks to be rotated. Because the disks can be rotated on two sides, various coordination exercises can be performed. Shoulders and elbows are also kept supple. The device is also easily adaptable for wheelchair users. The Fifty+ Arm rotation is standard equipped with blue EPDM on the disks.
