ADVANTAGES

- ✓ Developed in collaboration with TNO and Top Health Partners physiotherapists.
- ✓ EPDM rubber is also available in black.
- ✓ TÜV certified.

FIFTY+ ARM ROTATION FOR REGULAR USE AND WHEELCHAIR USE

FIT4LIFE

Article: 1388-02

On one side, the Fifty+ Arm rotation for regular use and wheelchair use consists of a frame with two discs to which handles are attached. This allows the disks to be rotated. On the other side, there is one disk. Because the equipment can be partly placed on a platform, it has a perfect height for wheelchair users from the other side. Because the disks can be rotated on two sides, various coordination exercises can be performed. Shoulders and elbows are also kept supple. The Fifty+ Arm rotation is standard equipped with blue EPDM on the disks.
