

IJSLANDER

ADVANTAGES

- ✓ Equipment can be combined into a playground with many play values.
- ✓ Equipment can be combined into a playground for all ages.

WATER PUMP DEEPER THAN 7M SPELEN

Article: 1853

A water pump guarantees success with children. In warm summer weeks, children love to splash around with water. This Water Pump can be used up to a maximal depth of 40.00m. Requirement for this pump is a source filter (minimum $\varnothing 100\text{mm}$ internal) in which the pump cylinder is placed at depth. The number of pipes required depends on the local water level (the pump cylinder must be placed at least 2m below the water level to have water available all year round). 8m tube is supplied as standard, if you need more, please indicate this in your quote request.
