BUILDING THE FUTURE

Ijlander has been building the future since 1996. We teach children and young people to discover more about themselves and the world around them. We show adults that playtime can still be fun. And we challenge the elderly to remain fit and active. We do this with our durable, low-maintenance and 100% recyclable sports and play equipment made from only the strongest of materials.

Reuse. This encourages careful handling of our raw materials and raises our awareness of what the earth provides us with. But also of the fact that raw materials are a finite resource. Because once a resource is gone, it is gone for good and will not return.

In order to take good care of the world of tomorrow, a circular economy in which everything is 100% reusable is crucial. Something that we have been striving for since the foundation of our company more than twenty years ago. For instance, we started by developing playground equipment from a single material: stainless steel. This is a product that is environmentally friendly, re-usable and very strong, reducing maintenance to a minimum. Because reduced maintenance is also better for the environment.

Click & Play

But more needs to be done to help secure the future. For instance, in 2016 we introduced Click & Play: a solution in the form of a click-together system based on building blocks to organise communal areas in a sustainable and flexible way. This means that the equipment can be easily swapped out, without requiring ground works. Major advantage: the place can grow in line with the demographic developments of the neighbourhood, while reducing the use of raw materials.

We have already fitted out several playgrounds with Click & Play play equipment. Due to the success in the Netherlands, we introduced Click & Play in other countries in 2018.

What's more, this innovation has spurred on yet another innovation within our organisation: from 2018, Ijlander offers its sports and play equipment not just in stainless steel, but also in other circular materials. A conscious choice to offer customers multiple options without compromising the future of our children. We will continue to build on this. Will you join us?

CLICK & PLAY

Choose, click, ready!

Click & Play is an advanced click system combined with building blocks whereupon equipment can be installed. Because of the fixed format of the building blocks, taking into account various play functions and safe zones, the surface doesn't have to be adapted when changing equipment. Multiple building blocks can be used in one play area.

Building Block A

Building Block A has the main function 'swinging'. Next to that, tumbling, balancing or climbing equipment can be installed on this building block.

Building Block B

Building Block B has the main function 'sliding'. Moreover, tumbling, balancing, rocking or climbing equipment can be installed on this building block.

Building Block C

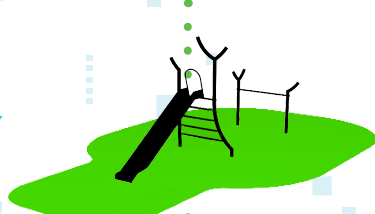

Building Block C has as main function 'spinning'. Besides, a seesaw can be installed on this building block. Building Block C MINI has a smaller diameter.

BUILDING BLOCK A

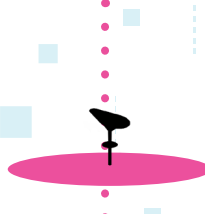

- Swinging
- Tumble
- Climbing
- Climbing Low
- Balance

BUILDING BLOCK B

- Climbing
- Wobble
- Sliding
- Tumbling
- Fantasy
- Balance

BUILDING BLOCK C

- Turning
- Seesaw
- Fantasy
- Wobble

BUILDING BLOCK C MINI

- Turning
- Seesaw
- Fantasy
- Wobble

Fit4Life

The Twenty+ gym series is adapted to the energy and mobility of young people. The Fifty+ gyms inspire the physical activities that keep older people fit and active. The Twenty+ and Fifty+ gyms were developed in partnership with physiotherapists to ensure that everyone carries out the exercises that are right for them.

CONDITIONS

IJSLANDER

Prices

- All our prices are based on rates that apply for steel and stainless steel alloys at the time the prices are issued.
- Prices are excluding VAT, net and ex works.
- Delivery and installation costs upon request.
- Prices are excluding foundation costs.
- Prices are per item.
- P.o.r.: Price on request.

★ = New/back in our range of products!

Terms of delivery

- Delivery Duty Unpaid, unless agreed otherwise.
- All our quotations, all orders placed with us and all contracts concluded with us, are subject to the METAALUNIE CONDITIONS. These conditions are filed with the register of the District Court of Rotterdam.

Safety

All our sports and playground equipment have been TÜV tested and certified. Certificates are available on request. This does not apply to our wooden appliances. We are awaiting the TÜV certificate for a number of equipments.

This is indicated on the equipment with a ●. This may take some time. If desired, you can have a location inspection carried out by yourself.

Warranty

On all our articles there is a 10-year warranty on structural components and 3 years on wear and moving parts; this does not apply to vandalism, damage to the coating and external contamination.

Certificates

Ijlander supplies high-quality products, and in its production process strives for the highest quality. The certificates that we have acquired endorse that objective: ISO 9001:2015, ISO 14001:2015, KOMO process certificate BRL9921 and VCA* 2017/6.0. The VCA certification declares that Ijlander carries out all the work under safe and healthy conditions while at the same time placing minimal strain on the environment.

CONDITIONS

IJSLANDER

Warranty ijslander wooden equipment: kupa series

Warranty period:

- 15 years at Robinia*
- 10 years on all other types of wood*
- 10 years on stainless steel construction parts
- 3 years on wear and moving parts

Warranty conditions:

- The warranty does not apply to vandalism and damage to coatings and contamination from outside.
- *Warranty applies if wood rot is caused by dry rot and mold. The wood must be damaged to such an extent that its load-bearing capacity no longer meets EN 1176.
- Demolition and damage to the appearance of the equipment are not covered by the aforementioned warranty.
- The warranty does not apply to natural weathering, discoloration and functioning of the wood.
- The warranty is void if the equipment is not inspected and maintained as prescribed in the equipment manual.
- The warranty is void if the equipment is not assembled correctly. The manual of the relevant equipment must be followed.
- The warranty is void if the equipment experiences corrosion and rot because it is placed within a distance of 200 meters from seawater.
- When using bark, sand, wood chips or a similar natural material, which is used as a shock-absorbing surface around the equipment and where the wooden posts are in the ground, the warranty period on Robinia is reduced to 10 years. For other types of wood this is reduced to 2 years.
- The warranty expires if adjustments or replacements are made without using the spare parts provided by Ijslander B.V. approved products.
- Warranty expires when Ijslander B.V. is not informed of a defect within 4 weeks from the moment it was discovered.
- We would like to point out that the delivery conditions of the Metaalunie Conditions apply to all our deliveries.

We would like to draw your attention to the fact that of the personal data that you have provided to us and possibly will provide, will be processed in the way that we have described in our privacy statement. You can find more information about the processing of your personal data and the rights you have at our website (www.ijslander.com/en/privacy-statement/).
